Specimen Requirements

Pervenio™ Lung NGS Next-Generation Sequencing

TEST DESCRIPTION:

Pervenio Lung NGS is a next-generation sequencing based test that detects genomic alterations in cancer-related genes in patients with non-small cell lung cancer (NSCLC).

Mutations in the following genes are assessed by NGS: AKT1, ALK, BRAF, CTNNB1, DDR2, EGFR, ERBB2, ERBB4, FBXW7, FGFR1, FGFR2, FGFR3, KRAS, MAP2K1, MET, NOTCH1, NRAS, PIK3CA, PTEN, SMAD4, STK11, and TP53.

Translocations in the following genes are assessed by NGS: EML4/ALK, RET, ROS1, NTRK1

SAMPLE REQUIREMENT: The specimen must be non-small cell lung cancer.

BLOCK:

- Submit a single FFPE block containing the highest percentage of tumor.

SLIDES:

- Ten 7 µm unstained sections mounted on slides must be submitted for each specimen to be tested.
- Each slide must be clearly labeled with the institutional FFPE block number.

* Additional sample requirement for FISH confirmatory testing: FFPE tissue block or three positively charged slides, 4 µm thickness
